Seasoned software engineer with 8+ years of experience in backend development, specializing in Java and Kotlin. Known for innovative problem-solving, deep technical expertise, and a strong commitment to delivering high-quality, scalable solutions. Passionate about tackling complex challenges with precision and efficiency.

SKILLS

Java[GraalVM] Kotlin Microservices Distributed Systems REST Spring Boot Spring Security
Spring Batch Spring Cloud JOOQ Design Patterns Data Structures Apache Kafka
SQL [PostgreSQL, MySQL] Tests [JUnit, Gatling, TestContainers] Jenkins
Docker [Azure Container Registry] Kubernetes [AKS, Redhat OCP, Helm]
Azure Services [DevOps, EventHubs, EventGrid, Blob Storage] CDC [Debezium]
Cache [Redis, JunoDB, Garnet] Code Review [SonarQube] Monitoring [Prometheus, Grafana]
Logging [OTEL, ELK, Splunk] Data Visualization [Grafana] VCS [GIT, Bitbucket]
Build Tools [Maven, Gradle] Project Management & Agile [Jira, Confluence] UML [PlantUML]
OpenAPI (Swagger)

WORK EXPERIENCE

Applications Engineer (Contract via TEKsystems Japan)

Rakuten Group

02/2024 - Present

Tokyo, Japan

A multinational conglomerate offering e-commerce, fintech, digital content, and communications services.

Achievements/Tasks

- Developed and maintained **APIs, batch jobs, and messaging queues** in **Kotlin** for **Rakuten GORA**, a golf-related application.
- Contributed to the **Swing Analysis** feature released in Oct 2024, implementing backend **APIs, batch processing, and event-driven queues** for real-time and asynchronous data processing.
- **Implemented Change Data Capture (CDC) with Debezium**, enabling **real-time streaming of database changes** for data consistency across services.
- Contributed to multicloud application development, ensuring seamless integration and deployment across different cloud platforms for enhanced availability and disaster recovery.

Senior Software Engineer

Luxoft India Pvt Ltd

03/2023 - 02/2024

Bengaluru, India

Digital transformation company delivering innovative solutions to clients worldwide.

Achievements/Tasks

- Made the devs lives easier by centralizing logging configuration.
- Successfully migrated the company's legacy systems to a new cloud-based platform.
- Implemented API Gateway features using Spring Cloud Gateway.
- Built and shipped Java applications using Spring Boot and Docker, which made the team more productive.

WORK EXPERIENCE

Software Development Engineer 3

PayPal India Pvt Ltd 

05/2022 - 03/2023

PayPal Holdings, Inc. engages in the development of technology platform for digital payments.

Chennai, India

Achievements/Tasks

- Worked with Checkout and Payment teams.
- Deprecated AU/CITI Co-Branded Card and its related configs.
- Learned SSRF Test, PEN Test and application Sunset.
- Developed a daemon service for listening to Credit Lifecycle events.
- When inner sourced Payments domain feature to Credit team, though the given time constraint is lean, we successfully delivered it by coordinating with cross domains.
- Awarded with "GEM" on the spot award for exceptional performance.

Senior Software Engineer

Altimetrik India Pvt Ltd 

05/2019 - 05/2022

Founded in 2012, it provides services for global enterprise customers across financial services, payments, retail, automotive, and other industries.

Chennai, India

Achievements/Tasks

- Part of AU/CITI Co-Branded Card design and development phase.
- Worked with PayPal's Credit and Identity teams.
- Experience in designing Spring Boot services from ground up.
- Designed and developed partner facing external service.
- Implemented a new feature in Identity service(identity service) and eligibility rulesets in Credit Eligibility service for applying AU/CITI Co-Branded Card.
- Recognized with the "GEM" award for exceptional performance and contributions to the project.

Java Developer

IVTL Infoview Technologies Pvt Ltd 

07/2016 - 05/2019

Infoview Technologies is one of the subsidiaries of Works Applications. Works Applications is an ERP system manufacturer in Tokyo, Japan.

Chennai, India

Achievements/Tasks

- Developed tools to check the coding standards.
- Worked as a backend engineer in developing storage drive for internal framework "CORTEX"
- Have been an active member in the development of the application and helped the fellow teammates.

PROJECTS WORKED

Rakuten GORA (02/2024 - Present)

- Worked in Swing Analysis module, helped team in developing APIs and Queue. These APIs and Queue enabled easy access to the analysis results after necessary transformations.
- We used Java, Kotlin, Spring for developing application code, MySQL as the primary database, Gatling for load testing, and deployed on AKS using Helm Charts and Jenkins. For monitoring, Prometheus with Grafana for metrics and ELK for logging kept our system in check.
- Azure Blob Storage configured with microsoft defender is used for storing the media files. Event Hubs are used as the message queue for handling the events.

Modernizing Legacy Credit Risk Platform Services with Cloud Migration (03/2023 - 02/2024)

- Migrated SCB's legacy credit risk platform services to cloud using Docker and OCP(Redhat OpenShift Container Platform), playing a key role in the project's success. Helped the infra team for centralizing the logging configuration and the certs.
- Application code is written in Java using SpringBoot framework, PostgresDB is used for persisting data. Apache Kafka is used for processing the events. ELK is used for collecting, analyzing, and visualizing log and event data. OCP is used for managing the containers.

PROJECTS WORKED

AS2 Order FI Update (10/2022 - 03/2023)

- AS2 Order FI Update project is all about updating the financial instrument id of existing open orders. This release/feature involves checkout and payments domain. This is applicable for updating FI id of the open orders in case of credit cards's PAN change.

Deprecating AU/CITI Co-Branded Card (05/2022 - 10/2022)

- After NAB's acquisition of CITI group's Australian consumer business, both parties (PayPal and CITI) agreed to terminate the contract and migrate product completely from PayPal to CITI.
- We worked seamlessly to migrate the product to CITI at the same time deprecating the code and configs in PayPal systems.

AU/CITI Co-Branded Card (05/2019 - 10/2022)

- AU/CITI Co-Branded Card is a credit card issued by CITI to its PayPal AU customers. This product is partnered with CITI as a white-label partnership. PayPal Rewards Card is the first cobranded card product being launched in AU market.
- Product is put together with technologies like Java, CloudEvents, AMQ, Node, React, GraphQL, PostgresDB.

Cortex Framework (01/2018 - 05/2019)

- Cortex is an application development framework used to develop applications efficiently. It's used internally to develop supporting tools for development.
- Developed a drive using this framework which is used along with internal ticket managing tool.

HUE (06/2017 - 01/2018)

- HUE is an ERP product which is being developed at present. It aims at reducing the man work and suits all types of company requirements. It contains modules such as Supply Chain Management (SCM), Accounts, Human Resource Management, etc.

CJK (10/2016 - 06/2017)

- CJK is an advanced ERP product that has been developed to manage enterprise related applications. A Project of converting Pascal product to new Web-based product. It contains modules such as Payroll Management, Accounts, Human Resource Management, etc.

EDUCATION

○ Bachelor of Computer Science and Engineering Adhiyamaan College of Engineering

06/2012 - 05/2016

Hosur, India
